## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14,23,25,26, drawn to a process for milling material, classified in class 241, subclass 16.
- II. Claims 15-22,24, drawn to a process for milling material, classified in class 241, subclass 30.
- III. Claims 27-29, drawn to a material, classified in class 428.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as milling material without the use of different sized media. See MPEP § 806.05(d).

Group III is separate from Groups I and II because the material can be formed with other processes besides those of Groups I and II

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Kilyk on 7/23/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3725

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
